This document was published on 26 September, 2023

You are about to purchase a product that is not simple and may be difficult to understand

#### What is this product?

**Type** This is a UCITS fund

#### Objectives

The objective of the Sub-Fund is to maximise total rates of return, meaning capital appreciation plus income of its investments, over the medium term primarily from returns of Credit Derivatives, with prudent levels of risk while maintaining generally moderate levels of volatility. It intends to achieve the investment objective by generating income and capital appreciation through the Income Portfolio (i.e. the Sub-Fund's long exposure) while seeking to reduce the market risk of the Income Portfolio through the Hedge Portfolio (i.e. the Sub-Fund's short exposure). This will be achieved primarily through long or short exposure via Credit Derivatives.

**Redemption and Dealing Shares:** Shareholders may subscribe/redeem units at the appropriate NAV per share provided an order request is received by the ICAV by the trade cut-off time 4.30pm (London time). Orders will be dealt the following working day. Subscriptions/redemptions must meet the minimum amounts as set out in the supplement of the Sub-Fund.

**Distribution Policy:** The Sub-Fund can launch both accumulating and distributing share classes. Please refer to [www.tabulaim.com/documents](http://www.tabulaim.com/documents) and search “dividend calendar” for further information.

- The investment process used by the Sub-Fund is generally systematic and research driven in nature. The Sub-Fund's investment process combines a systematic approach (i.e. a rules-based core strategy) with an active discretionary overlay.
- The Sub-Fund will invest in the following instruments through the Income and/or Hedge Portfolio: Credit derivatives on credit default swap indices and OTC Total Return Swaps on corporate debt indices.
- The following will be invested in as part of collateral assets: fixed or floating rate investment grade debt securities issued by members of the EU and developed market corporates and collective investment schemes investing in investment grade corporate debt securities.

**Intended Retail Investor** The Fund is intended for well-informed investors aiming to invest over the long term, who are able to make an informed investment decision based on this document and the Prospectus, have a risk appetite consistent with the risk indicator below and understand that there is no capital guarantee protection (100% of capital is at risk).

## What are the risks and what could I get in return?

**Lower risk**

Typically Lower Rewards

**Higher risk**

Typically Higher Rewards

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back. Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The Sub-Fund has been rated as a 3 due to the nature of its investments and frequency of price movements which includes the following. This rates the potential losses from future performance at a medium level and poor market conditions could impact the capacity of the Sub-Fund to pay you.

### Key risks:

**No capital protection:** The value of your investment may go down as well as up and you may not get back the amount you invested.

**Market risk:** The Sub-Fund is primarily exposed to long and short credit risk. Returns will decrease if there is a default, or higher perceived risk of default, among the entities referenced by the CDS indices, or a write-down ("bail in") of an entity's debt by financial authorities. The Sub-Fund may also be impacted by other factors affecting the value of debt securities issued by those entities, including changes in interest rates and exchange rates. When buying and selling CDS on subordinate debt, such debt may be subordinate to senior debt.

**Counterparty risk:** The Sub-Fund may incur losses if any institution providing services such as safekeeping of assets or acting as a derivatives counterparty becomes insolvent.

**Credit risk:** The issuer of a financial asset held within the Fund may not pay income or repay capital to the Sub-Fund when due.

**Leverage:** the Sub-Fund may use leverage, so losses may be magnified.

**Risk of financial derivatives and techniques:** The Sub-Fund invests in financial derivative instruments to gain both long and short market exposure to the underlying market with rebalancing on a monthly basis. The performance of the Sub-Fund over periods longer than one month may not be inversely proportional or symmetrical with the returns of the reverse positions in the underlying instruments.

**Capital Protection:** this product does not include any protection from future market performance so you could lose some or all of your investment.

A more detailed description of risk factors that apply to this product is set out in the fund supplement.

### Performance Scenarios

The figures shown include all the costs of the product itself (the ongoing costs of the representative share class) but may not include all the costs that you pay to your advisor or distributor / and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Fund over the last 5 years.

#### Performance Scenarios:

Recommended hold period: 5 years

Investment: € 10,000

Scenarios		If you exit after 1 year	If you exit after 3 years	If you exit after the 5-year recommended holding period
Stress Scenario	<b>What you might get back after costs</b>	€ 5,762.48	€ 6,323.70	€ 5,469.16
	Average Return each year	-42.38%	-14.17%	-11.37%
Unfavourable Scenario	<b>What you might get back after costs</b>	€ 8,076.33	€ 8,556.17	€ 8,525.48
	Average Return each year	-19.24%	-5.06%	-3.14%
Moderate Scenario	<b>What you might get back after costs</b>	€ 10,132.38	€ 10,887.20	€ 11,162.43
	Average Return each year	1.32%	2.87%	2.22%
Favourable Scenario	<b>What you might get back after costs</b>	€ 12,045.06	€ 11,779.11	€ 12,504.84
	Average Return each year	20.45%	5.61%	4.57%

The SRI and performance scenarios computation have been integrated using data of the proxy: 'Bloomberg Global High Yield Total Return Index Value Hedged EUR'.

### What happens if Tabula Investment Management Limited is unable to pay out?

The assets of the Fund are segregated from those of Tabula Investment Management Limited. In addition, HSBC Continental Europe, Dublin Branch, as the depository of Tabula ICAV funds (the "Depository"), is responsible for the safekeeping of the assets of the Fund. To that effect, if Tabula Investment Management Limited defaults, there will be no direct financial impact on the Fund. In addition, the Fund's assets shall be segregated from the Depository's assets, which limits the risk for the Fund suffering some loss in case of default of the Depository. As a unitholder in the Fund, there is no compensation or guarantee scheme in place.

### What are the costs?

The person selling to you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs and show you the impact that all costs will have on your investment over time.

Investment: € 10,000	If you cash in after 1 year	If you cash in after 3 years	If you cash in at the end of the 5 years
Total costs	€ 95.00	€ 313.83	€ 542.09
Annual cost impact (*)	0.95%	0.979%	0.974%

(\*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your median return per year before cost (the ongoing cost of the representative share class) is projected to be 2.22% and your median return per year after costs is projected to be 3.2%.

### Composition of costs

The table below shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period and the meaning of the different cost categories. Note that there is no performance fee.

Impact on return per year			
One-off costs	Entry costs	0.00%	The costs you pay when entering your investment
	Exit costs	0.00%	
Other Ongoing Costs: this is the total expense ratio	Portfolio transaction		The cost of buying and selling the underlying investment for the product
	Other ongoing costs	0.95% (unhedged ordinary share classes)	The costs that we take each year for managing your investment
		0.99% (hedged ordinary share classes)	
0.59% (unhedged founder share)			
Incidental costs	Performance fees	N/A	

Transaction Cost: This is an estimate of the costs incurred when we buy and sell the underlying investments of the product. The actual amount will vary depending on how much we buy and sell

Other Ongoing Costs: this is the total expense ratio

### How long should I hold it and can I take money out early?

The funds are designed to be held over the long term and we recommend you hold this investment for at least 5 years.

You can request to take some or all your money out at any time, you can typically require to buy or sell shares in the sub fund on any business day (set out in the fund supplement)

If you sell your shares at an earlier stage this will increase the risk of lower investment returns or losses.

### How can I complain?

If you wish to make a complaint about the Fund, the Issuer or any person advising or selling the fund, you should write to: Tabula Investment management, 55 Strand, London WC2N5LR. Alternatively, you can email [IR@tabulagroup.com](mailto:IR@tabulagroup.com) or via our website <https://www.tabulaim.com/contact/>
