Objectives and investment policy

The objective of the Sub-Fund is to maximise total rates of return, meaning capital appreciation plus income of its investments, over the medium term primarily from returns of Credit Derivatives, with prudent levels of risk while maintaining generally moderate levels of volatility. It intends to achieve the investment objective by generating income and capital appreciation through the Income Portfolio (i.e. the Sub-Fund's long exposure) while seeking to reduce the market risk of the Income Portfolio through the Hedge Portfolio (i.e. the Sub-Fund's short exposure). This will be achieved primarily through long or short exposure via Credit Derivatives.

- The investment process used by the Sub-Fund is generally systematic and research driven in nature. The Sub-Fund's investment process combines a systematic approach (i.e. a rules-based core strategy) with an active discretionary overlay.
- The Sub-Fund will invest in the following instruments through the Income and/or Hedge Portfolio: Credit derivatives on credit default swap indices and OTC Total Return Swaps on corporate debt indices.
- The following will be invested in as part of collateral assets: fixed or floating rate investment grade debt securities issued by members of the EU and developed market corporates and collective investment schemes investing in investment grade corporate debt securities.

- The Share Class of the Sub-Fund will accumulate income in its value.
- This Sub-Fund may not be appropriate for short-term investment.
- The Share Class is denominated in USD. The Sub-Fund is denominated in EUR.
- Shareholders may subscribe/redeem units at the appropriate NAV per share provided an order request is received by the ICAV by the trade cut-off time 4.30pm (London time). Orders will be dealt the following working day. Subscriptions/redemptions must meet the minimum amounts as set out in the supplement of the Sub-Fund.

For more information on the Share Class of the Sub-Fund, please see the supplement for the Sub-Fund and the prospectus of Tabula ICAV, available upon request.

Typically higher rewards

This indicator is based on historical data and may not be a reliable indication of the future risk and reward profile of the Share Class.

The risk category shown is not guaranteed and may shift over time.

The lowest category (Category 1) does not mean 'risk free'.

The Share Class is rated 5 due to the nature of its investments and the frequency of price movement which include the following risks which may impact the value of the Share Class or expose it to losses.

- No capital protection: The value of your investment may go down as well as up and you may not get back the amount you invested.
- Liquidity risk: Lower liquidity means there are insufficient buyers or sellers to allow the Sub-Fund to sell or buy investments readily. Neither the Index provider nor the issuer make any representation or forecast on liquidity.

- Risk of financial derivatives and techniques: The Sub-Fund invests in financial derivative instruments to gain both long and short market exposure to the underlying market with rebalancing on a monthly basis. The performance of the Sub-Fund over periods longer than one month may not be inversely proportional or symmetrical with the returns of the reverse positions in the underlying instruments.
- Foreign exchange risk: The Sub-fund invests in EUR and USD denominated assets and does not provide a hedge to currency exposure in the base class. Strengthening or weakening of currencies may impact performance.
- Leverage: The Sub-Fund may use leverage, so losses may be magnified.
- Liquidity risk: Lower liquidity means there are insufficient buyers or sellers to allow the Sub-Fund to sell or buy investments readily. Neither the Index provider nor the issuer make any representation or forecast on the liquidity of CDS transactions.
- Counterparty risk: The Sub-Fund may incur losses if any institution providing services such as safekeeping of assets or acting as a derivatives counterparty becomes insolvent.
- Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Sub-Fund when due.
